

## **PARTNERS IN CONSERVATION MINING & RANCHING**

American Colloid Company is sponsoring a multi-year UW Sage Grouse research project beginning in March of 2011. For this upcoming study season, we're looking for a 2-3 bedroom house/apartment (including appliances) for our technicians from March through August in the Hyattville, Manderson, Greybull, Shell, or Basin area....the eastern side of the basin. Ideally, the place(s) would be pet friendly. Contact Aaron Pratt @ 361-960-0946 or 701-866-0978 or [aaroncpratt@yahoo.com](mailto:aaroncpratt@yahoo.com).

The Guardians are pleased to assist American Colloid in securing rental housing for the above project. Mining interests have served on the Big Horn Basin Sage-grouse Local Working Group for the last six years via the efforts of Matt Call of Wyo Ben.

American Colloid is working to get the Cheat grass and other reclamation problems turned around in the Big Horn Basin. They too recognize that habitat is critical to Sage Grouse conservation.

This notice is also posted on our website: [www.guardiansoftherange.org](http://www.guardiansoftherange.org)

As a fellow multiple use industry on our public lands, the Guardians support American Colloid's demonstrated interest in problem solving. Let's help them 'get 'er done'!
